Date: December 2016
Author: Jack Gerrard
Version: 4.2.2

This latest release introduces a new locale translation and some fixes as notified and/or requested in uniCenta forums along with other directly and un-reported items.

This Readme and other Guides are made available to uniCenta Customers only.
Source code access is available to uniCenta Customer Subscribers only.

This version – like all previous versions - does not include an upgrade from any beta to release versions.

IMPORTANT :   uniCenta oPOS Beta versions should not be run in production or live environments nor connected to a production or live MySQL database.

UPDATING : If you are updating your version please ensure at least version 4.2 is installed and running correctly

Wishing you a very Merry Christmas & a Happy and Prosperous New Year

Jack
